

## Fremont Early College Alliance

Earn dual (high school/college) credit while still in high school and work toward a Trine University associate degree.

The dual enrollment program and associate degree program are offered through a partnership between Trine University and Fremont High School. Select from eighteen courses offered at Fremont High School for high school credit and Trine University credit. Fremont High School students can also enroll in additional courses available on the Trine University campus at a reduced tuition. If a Fremont student completes all academic course requirements to earn an associate degree, the student will be awarded an associate degree on the condition the student attends Trine University directly after high school graduation and successfully completes one semester as a full-time degree-seeking student.

Follow this link to Trine University Dual Enrollment to learn more about earning an associate degree in high school and dual credit.
